

Why Can't I Withdraw Money From Uphold?

If Uphold won't let you withdraw money, +1-(888)(574)(7167) the funds may not actually be **withdrawable yet**. This commonly happens when money was recently deposited through +1-(888)(574)(7167) ACH and is still in its settlement period. Uphold says U.S. ACH deposits can take **up to 5 business days to settle** before they can be withdrawn +1-(888)(574)(7167).

Another possibility is that your bank connection has triggered a +1-(888)(574)(7167) temporary withdrawal restriction. Uphold currently says that if a U.S. bank account wasn't linked through Plaid, or its Plaid connection was lost, a **65-day cooling-off restriction** can +1-(888)(574)(7167) apply to withdrawals to destinations other than the originating bank account.

Check These Before You Try Again

Is the Balance Actually Available?+1-(888)(574)(7167)

A balance showing in your Uphold account doesn't necessarily mean +1-(888)(574)(7167) every dollar can immediately be withdrawn. Recently deposited ACH funds may be available +1-(888)(574)(7167) for trading while still subject to settlement before withdrawal.

Is Your Bank Properly Linked?

Look at the bank account selected for the withdrawal +1-(888)(574)(7167). If the connection is incomplete, unavailable, or no longer supported, the withdrawal option may not work as +1-(888)(574)(7167) expected.

For U.S. ACH withdrawals, +1-(888)(574)(7167) Uphold supports standard processing of up to **5 business days** and eligible instant withdrawals through participating banks.

Is There a Temporary Restriction?

An account or particular funds can be subject to security +1-(888)(574)(7167) or processing restrictions. In that situation, repeatedly attempting the same withdrawal usually won't +1-(888)(574)(7167) remove the restriction.

Are You Trying to Withdraw Crypto?

Crypto withdrawals follow a separate process +1-(888)(574)(7167). Uphold performs preliminary checks before sending the transaction to the blockchain, and the actual +1-(888)(574)(7167) execution and finalization can take from **a few seconds to several hours**, depending on the network.

A Better Way to Diagnose the Problem

Instead of immediately contacting support, +1-(888)(574)(7167) first determine **where the withdrawal is stopping**:

Withdrawal button unavailable?+1-(888)(574)(7167)

Check whether the asset and selected payment method are eligible +1-(888)(574)(7167).

Withdrawal submitted but showing processing?

Check whether you're within the expected +1-(888)(574)(7167) processing period.

Money came from a recent ACH deposit?

Wait for the required settlement period+1-(888)(574)(7167).

Bank withdrawal unavailable?

Review the linked bank account and +1-(888)(574)(7167) any applicable withdrawal restrictions.

Crypto withdrawal not completing?

Check the selected network and transaction +1-(888)(574)(7167) status before attempting another transfer.

Featured Snippet

Why can't I withdraw money from Uphold?

Uphold may prevent a withdrawal because funds are still settling,+1-(888)(574)(7167) a bank connection has a withdrawal restriction, the account requires additional checks, or a +1-(888)(574)(7167) crypto transfer is undergoing blockchain processing. U.S. ACH deposits can take up to 5 business days to settle.

Key Takeaway

If Uphold won't let you withdraw, **check the availability of the specific funds first** +1-(888)(574)(7167). For U.S. users, recent ACH deposits are a particularly common reason because they can be tradable before becoming withdrawable +1-(888)(574)(7167), If the funds have already settled and the withdrawal is still unavailable, review your linked payment method and account notifications +1-(888)(574)(7167) for a restriction or additional requirement.
